	Biology To Understand Evolution and	Biology	Biology				
1	<ul> <li>Inheritance</li> <li>Identify how humans resemble their parents in many features.</li> </ul>	<ul> <li>To Investigate Living Things</li> <li>Identify that most living things live in habitats to which they are suited and describe how different habitats provide for</li> </ul>	<ul> <li>To Understand Plants</li> <li>Identify and name a variety of common plants, including garden plants, wild plants and trees and those classified as deciduous</li> </ul>				
2		the basic needs of different kinds of animals and plants and how they depend on each other.	<ul> <li>Identify and describe the basic structure of a variety of common flowering plants,</li> </ul>				
3	Biology To Understand Animals and Humans	• Identify and name a variety of plants and animals in their habitats, including microhabitats.	<ul> <li>including roots, stem/trunk, leaves and flowers.</li> <li>Observe and describe how seeds and bulbs</li> </ul>				
4	<ul> <li>Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</li> <li>Notice that animals, including humans,</li> </ul>	Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.	<ul> <li>Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.</li> </ul>				
5	<ul> <li>have offspring which grow into adults.</li> <li>Investigate and describe the basic needs of animals, including humans, for survival (water, food and air).</li> </ul>	Chemistry To Investigate Materials  • Distinguish between an object and the	<ul> <li>Identify and name a variety of common animals that are birds, fish, amphibians, reptiles, mammals and invertebrates.</li> </ul>				
6		<ul> <li>material from which it is made.</li> <li>Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water and rock.</li> </ul>	<ul> <li>Identify and name a variety of common animals that are carnivores, herbivores and omnivores.</li> <li>Describe and compare the structure of a</li> </ul>				
7		Describe the simple physical properties of a variety of everyday materials.	variety of common animals (birds, fish, amphibians, reptiles, mammals and invertebrates, including pets).				
8	Biology To Investigate Living Things	Compare and group together a variety of everyday materials on the basis of their simple physical properties.   The description of the basis of their	Physics				
9	<ul> <li>Explore and compare the differences between things that are living, that are dead and things that have never been alive.</li> </ul>	Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.	<ul> <li>To Understand Movement, Forces and Magnets</li> <li>Notice and describe how things move, using simple comparisons such as faster and slower.</li> </ul>				
10		<ul> <li>Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick/rock and paper/cardboard for particular uses.</li> </ul>	Compare how different things move.				
11	<ul> <li>Physics</li> <li>To Understand Electrical Circuits</li> <li>Identify common appliances that run on electricity.</li> <li>Construct a simple series electrical circuit.</li> </ul>	Physics To Understand The Earth's Movement in Space  • Observe the apparent movement of the Sunduring the day.	Physics To Understand Light and Seeing  Observe and name a variety of sources of light, including electric lights, flames and the Sun, explaining that we see things because light travels from them to our eyes.				
12		<ul><li>Observe changes across the four seasons.</li><li>Observe and describe weather associated</li></ul>	Physics To Investigate Sound and Hearing  Observe and name a variety of sources of				

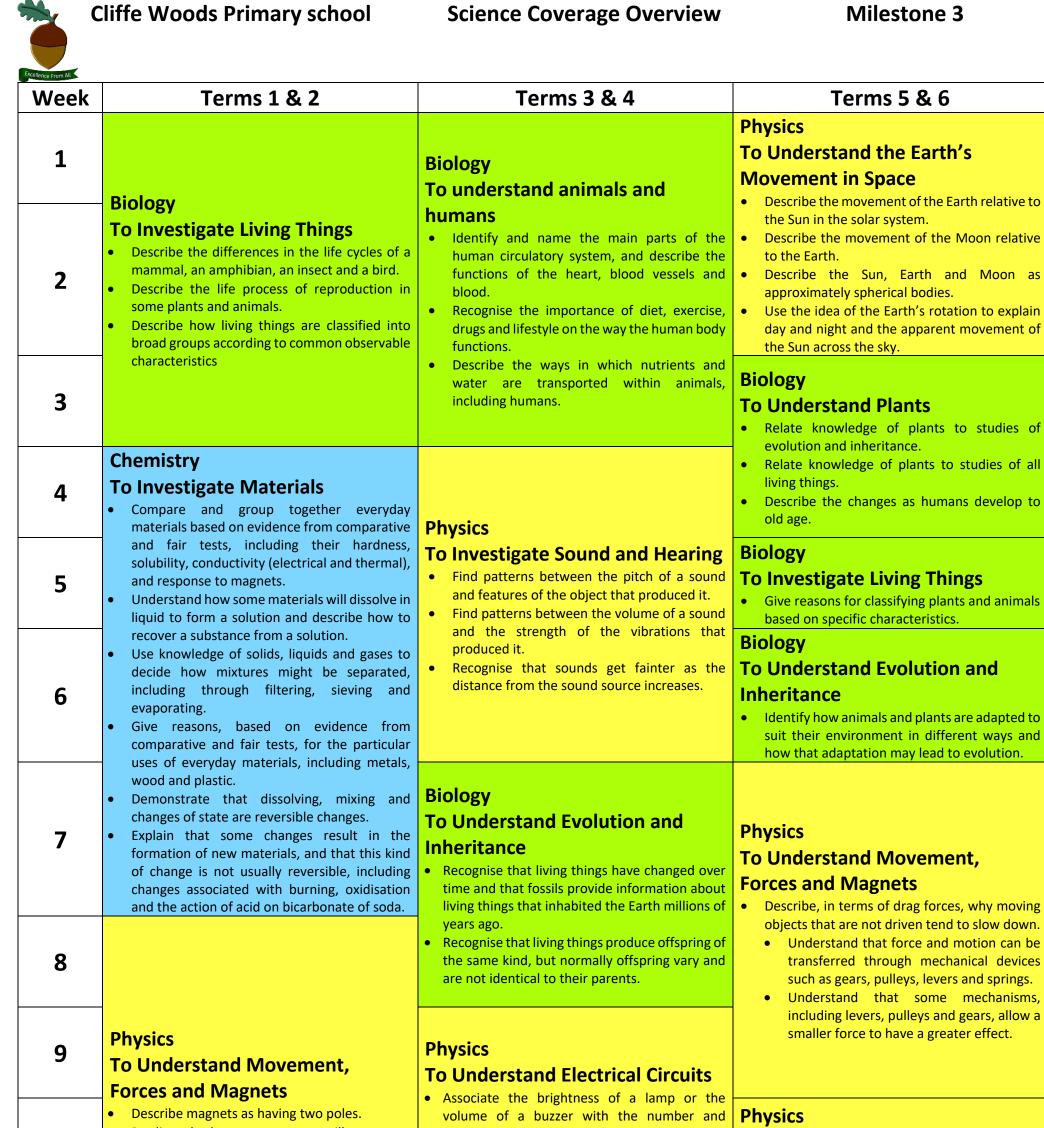

with the seasons and how day length varies.

• Observe and name a variety of sources of

sound, noticing that we hear with our ears.

5	<ul> <li>Biology         To Understand Plants         <ul> <li>Identify and describe the functions of different parts of flowering plants: roots, stem, leaves and flowers.</li> </ul> </li> <li>Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant.</li> <li>Investigate the way in which water is transported within plants.</li> <li>Explore the role of flowers in the life</li> </ul>	Identify the different types of teeth in humans and their simple functions.	<ul> <li>two objects, but magnetic forces can act at a distance.</li> <li>Observe how magnets attract or repel each other and attract some materials and not others.</li> </ul>	
6			<ul> <li>Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet and identify some magnetic materials.</li> <li>Describe magnets as having two poles.</li> <li>Predict whether two magnets will attract or repel each other, depending on which poles are</li> </ul>	
7	cycle of flowering plants, including pollination, seed formation and seed dispersal.		Physics To Understand Light and Seeing	
8	Biology To Understand Animals and	Biology To Investigate Living Things  • Recognise that living things can be grouned.	<ul> <li>Recognise that light is required in order to see things and that dark is the absence of light.</li> <li>Notice that light is reflected from surfaces.</li> </ul>	
9	<ul> <li>Humans</li> <li>Identify that animals, including humans, need the right types and amounts of nutrition, that they cannot make their own food and they get nutrition from what they eat.</li> </ul>	<ul> <li>Recognise that living things can be grouped in a variety of ways.</li> <li>Explore and use classification keys.</li> <li>Recognise that environments can change and that this can sometimes pose dangers to specific habitats.</li> </ul>	<ul> <li>Recognise that light from the Sun can be dangerous and that there are ways to protect your eyes.</li> <li>Recognise that shadows are formed when the light from a light source is blocked by a solid object.</li> <li>Find patterns in the way that the size of a shadow changes.</li> </ul>	
10	<ul> <li>Chemistry</li> <li>To Investigate Materials</li> <li>Compare and group materials together, according to whether they are solids, liquids or gases.</li> </ul>	Physics To Understand Movement, Forces and Magnets  • Compare how things move on different surfaces.	Physics To Understand Electrical Circuits  Identify common appliances that run on electricity.  Construct a simple series electrical circuit,	
11	<ul> <li>Observe that some materials change state when they are heated or cooled, and measure the temperature at which this happens in degrees Celsius (°C), building on the teaching in</li> </ul>	Physics To Understand Sound and Hearing	<ul> <li>identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers.</li> <li>Identify whether or not a lamp will light in a simple series circuit, based on whether or not</li> </ul>	
12	mathematics.  Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.	<ul> <li>Identify how sounds are made, associating some of them with something vibrating.</li> <li>Recognise that vibrations from sounds travel through a medium to the ear.</li> </ul>	<ul> <li>the lamp is part of a complete loop with a battery.</li> <li>Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.</li> </ul>	

Predict whether two magnets will attract or repel each other, depending on which poles are facing.

**10** 

11

**12** 

- Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object.
- Identify the effect of drag forces such as air resistance, water resistance and friction that act between moving surfaces.
- voltage of cells used in the circuit.
- Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches.
- Use recognised symbols when representing a simple circuit in a diagram.

#### **Physics**

## To Understand the Earth's **Movement in Space**

• Describe the movement of the Earth relative to the Sun in the solar system.

# To Understand Movement,

- Describe, in terms of drag forces, why moving objects that are not driven tend to slow down.
  - Understand that force and motion can be transferred through mechanical devices such as gears, pulleys, levers and springs.
  - Understand that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.

### **To Understand Light and Seeing**

- Understand that light appears to travel in straight lines.
- Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eyes.
- Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them, and to predict the size of shadows when the position of the light source changes.
- Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.
